Sub Task #1: Mentions issues or no issues

## Task Response Prompt

Explain in concise steps how this logically works

Response:

Content itself was clear and understood, however I had some issues with the test system. The test system asks for a difficulty level, which I left at intermediate (default setting) and it was asking about concepts that either were not covered or we were not required to read.

Sub-Task

Group: Github Readings  
Task #2: Reflection  
Sub Task #2: Summarize core concepts related to the readings

## Task Response Prompt

Explain in concise steps how this logically works

Response:

The readings that were on W3Schools explained the basics of git, how to create a repository, an SSH key and how to configure that SSH key to a GitHub account. In addition, it explained branches, how to create them, switch between them, how to add/modify files to the repository, and the concepts of push, pull, clone, merge, fetch.
